GREENWAY MEDICAL TECHNOLOGIES' FLAGSHIP EHR SOLUTION, PRIMESUITE, COMPLIES WITH E-PRESCRIBING REGULATIONS AND PQRI QUALITY INITIATIVES TAKING EFFECT IN JANUARY 2009

EHR Solution Contains Inherent e-Prescribing and Quality Reporting Functionality Enabling Eligible Professionals to Receive up to a Four Percent Increase on Medicare Reimbursements

October 6, 2008, Carrollton, Ga. – Greenway Medical Technologies Inc. today announced that its flagship electronic health record (EHR) solution, PrimeSuite[®], complies with all necessary standards and regulations that physicians will be required to meet starting January 1, 2009 in order to receive the two percent increase on Medicare reimbursement payments for e-Prescribing as mandated by the Medicare Improvements for Patients and Providers Act (MIPPA) of 2008.

Greenway's newly CCHIT Certified[®] 08 Ambulatory EHR, PrimeSuite 2008, enables physicians to submit prescriptions electronically to a pharmacy without the need for data reentry. The e-Prescribing functionality is also infused with inherent safeguards that take into account patient demographics, dates of last visits and any drug allergies of which physicians and pharmacists must be aware when treating patients and filling prescriptions.

By utilizing PrimeSuite's e-Prescribing functionality, care providers are able to submit regulatory-compliant e-prescriptions to pharmacies through the integration with DrFirst's GoldRx[™] certified Rcopia[™] electronic prescription management system. Prescription information and patient data flows seamlessly through PrimeSuite's e-Prescribe, powered by DrFirst's real-time, fail-safe, physician connectivity services and is routed directly to SureScripts-RxHub, which securely delivers the information to the pharmacies and payer networks.

Along with meeting the CCHIT[®] 08 e-Prescribing criteria, PrimeSuite meets all qualifications for e-Prescribing as set by the Department of Health and Human Services (HHS). PrimeSuite also meets all 119 recordable quality measures included within the Physicians Quality Reporting Initiative (PQRI), a voluntary program that provides financial incentives to eligible professionals who successfully report on a specified set of data gathered from services and procedures they

(more)

provide to patients under the Medicare Physician Fee Schedule. With *PrimeSuite*, reporting codes are incorporated into the clinical documentation process at the point-of-care and then aggregated with the other charge data, eliminating additional work for the administrative staff resulting from PQRI charge capture.

“Physicians that utilize *PrimeSuite* to streamline the clinical, financial and administrative workflows of their practices can also benefit from the e-Prescribing reimbursement increases as well as the PQRI incentives that will be available to eligible care providers starting in January, 2009,” said Justin Barnes, vice president of marketing and government affairs at Greenway Medical. “The e-Prescribing and PQRI reporting functionality of *PrimeSuite* is another way that physicians can experience increased return on investments through the implementation of industry-leading health information technology (HIT).”

“We are very pleased to congratulate Greenway for achieving CCHIT 08 Ambulatory EHR certification,” said G. Cameron Deemer, president of DrFirst. “We strongly encourage the adoption of e-Prescribing now so that practices are prepared to receive incentives beginning January 1, 2009, and do not get caught in the last minute rush to implement at the end of this year.”

About Greenway Medical Technologies Inc.

Greenway Medical Technologies provides the latest in ambulatory healthcare business solutions and services to more than 20,000 healthcare providers and professionals nationwide, in 30 specialties and subspecialties, by enhancing the delivery of patient care through innovative HIT software and on-demand services that allow physician practices to function at their highest level of efficiency. Greenway's *PrimeSuite* is a comprehensive, interoperable component of the integrated physician's infrastructure solution, which serves as the starting point of a long-term business plan for physician practices. *PrimeSuite* 2008's EHR component, which is certified by CCHIT[®] based on 08 Ambulatory EHR certification requirements, integrates a practice's clinical, financial and administrative processes, and allows practices to increase profitability, enhance patient satisfaction and facilitate adherence to compliance guidelines. Established in 1998, Carrollton, Ga.-based Greenway Medical Technologies is a privately held company with 270 employees. For more information about Greenway, visit www.greenwaymedical.com.

About DrFirst

DrFirst is a national provider of physician connectivity services through its award-winning, GoldRx Certified Rcopia electronic prescription management system. Founded in 2000, DrFirst creates innovative services targeted to physicians in both ambulatory and acute care environments. DrFirst solutions are widely integrated with practice management and electronic medical records software through its "Open Borders" program, and the company counts among its client base not only physician practices, but major health plans, health systems, and EMR vendors. DrFirst partners with SureScripts and RxHub for pharmacy connectivity, health plan information, and patient medication history. More information about DrFirst can be found at www.drfirst.com.
