GREENWAY MEDICAL TECHNOLOGIES CONTINUES FAST-PACED GROWTH WITH ADDITION OF CARDIOVASCULAR SPECIALTY ASSOCIATES OF NORTH TEXAS (CSANT)

Greenway's Consistent Growth Highlighted with Signing of 1,000th Customer

March 18, 2009, Carrollton, Ga. – Greenway Medical Technologies, a leading provider of integrated electronic health records (EHR), practice management and interoperability solutions, today announced Cardiovascular Specialty Services of North Texas (CSANT) will be deploying PrimeSuite 2008, Greenway's CCHIT Certified[®] 08 EHR product that includes certification in cardiovascular medicine.

CSANT highlights Greenway's continued industry and specialty-specific growth, which recently topped 1,000 customers. CSANT will utilize PrimeSuite[®] to streamline its clinical, financial and administrative workflows and create an interoperable system that allows the 50-physician practice to share patient information amongst the 18 locations in the CSANT network and, ultimately, with other care providers in the greater-Dallas metroplex.

CSANT has been treating patients in northern Texas for more than 25 years and is one of the largest cardiology groups in the region, seeing several thousand patients each year. Headquartered in Irving, Texas, with offices throughout Dallas and northern Texas, CSANT focuses on all aspects of complete cardiology care with specific expertise in advanced cardiac and vascular care, organ transplants and national research.

Along with using PrimeSuite, CSANT will utilize other components of Greenway's complete physician's infrastructure to enhance practice workflows and create a system by which information can be exchanged seamlessly between the practice's 18 locations. CSANT's main billing office will utilize PrimeEnterprise to provide centralized billing functionality that will enable the main office to aggregate patient data from each practice into a single and secure database from which clinical, financial and administrative information can be compiled and processed. CSANT will also deploy Greenway's PrimeMobile[™] to improve physician mobility as well as PrimePatient[®] to streamline patient visits and enhance patient interaction with CSANT physicians and staff.

(more)

“We are very pleased to begin working with a leader like CSANT and look forward to providing them with a full complement of healthcare information technology that will look to improve the quality and workflow of its practices,” said Tee Green, president of Greenway Medical. “As the concept of interoperability becomes a reality and as the government begins offering its stimulus incentives, practices like CSANT are well positioned to receive these incentives while also adding an interoperable system that will improve healthcare across the nation.”

“Greenway offered us the most complete and customizable solution that best fit our practices,” said Greg Johnson, CEO of CSANT. “It was imperative that we implemented a fully-integrated solution that connected all of our practices and provided our physicians with the tools necessary to continue providing the highest level of care.”

About Greenway Medical Technologies Inc.

Greenway Medical Technologies provides the latest in ambulatory healthcare business solutions and services to more than 23,500 healthcare providers and professionals nationwide, in 30 specialties and subspecialties, by enhancing the delivery of patient care through innovative HIT software and on-demand services that allow physician practices to function at their highest level of efficiency. Greenway's PrimeSuite is a comprehensive, interoperable component of the integrated physician's infrastructure solution, which serves as the starting point of a long-term business plan for physician practices. PrimeSuite 2008 is certified by CCHIT[®] based on 08 Ambulatory EHR certification requirements. PrimeSuite integrates a practice's clinical, financial and administrative processes, and allows practices to increase profitability, enhance patient satisfaction and facilitate adherence to compliance guidelines. Established in 1998, Carrollton, Ga.-based Greenway Medical Technologies is a privately held company with approximately 300 employees.
