GREENWAY MEDICAL TECHNOLOGIES TO DISPLAY LIVE INTEROPERABILITY IMPLEMENTATIONS AT 2009 DIA SHOW

Industry Leading Health IT Providers Collaborate to Demonstrate Interoperability with Clinical Sites, Research Sponsors and Regulators through Utilization of RFD Standard

June 19, 2009, Carrollton, Ga. – Greenway Medical Technologies, a leading provider of an integrated electronic health record (EHR), practice management and interoperability solution, today announced its participation in the Drug Information Association's (DIA) 45th annual convention taking place in San Diego, June 21-25.

During the DIA convention, Greenway[®], with its industry leading and 08 CCHIT Certified[®] electronic health record (EHR), PrimeSuite 2008, will be participating in the Clinical Data Interchange Standards Consortium's (CDISC) live healthcare link demonstration at booth 1915. At the exhibit, Greenway will showcase its collaboration with the retrieve form for data capture's (RFD) integration profile, which facilitates data interoperability between clinical research and clinical care providers by integrating the processes and workflows of electronic data capture (EDC), spontaneous adverse event (AE) reporting and EHRs such as PrimeSuite[®].

Currently, Greenway is the only leading EHR provider to fully embrace RFD in multiple real-world situations including several registry studies with Outcome Sciences and a multi-site retrospective study with Nextrials. Greenway also allows for the capabilities of the ASTER (Adverse Drug Event Spontaneous Triggered Electronic Reporting) study, which enhances pharmacovigilance whereby negative or adverse drug reactions can be reported instantly to the FDA, who can then report any issues or warnings to the public. Participation in demonstrations like those held at DIA help facilitate other real-world interoperability collaborations.

Greenway will be participating in two scenarios at DIA, a clinical research scenario and a drug safety scenario. Greenway's PrimeSuite will highlight the source form within the EHR and allow for pre-population of the forms with relevant data that allows clinicians and care providers to review the data and complete any additional data entry prior to form submission. PrimeSuite will also be showcased at the Greenway booth, #2015.

(more)

“Our participation in the DIA show demonstrates the versatility and comprehensiveness of Greenway and its *PrimeSuite* solution,” said Jason Colquitt, director of research and outcomes at Greenway Medical. “It is important that the health IT industry continues taking the necessary steps that will lead to widespread interoperability and participation in shows such as DIA ensure that we are on the right path.”

“RFD has proven to be a very effective integration tool as it can sync an EHR such as Greenway’s *PrimeSuite* with multiple clinical research sponsors. The investigator can then easily surface their electronic case report forms from within the workflow of the EHR,” said Landon Bain of CDISC. “RFD also creates safeguards that enable the reporting of any adverse drug events as they happen.”

About Greenway Medical Technologies Inc.

Greenway Medical Technologies provides the latest in ambulatory healthcare business solutions and services to more than 24,000 healthcare providers and professionals nationwide, in 30 specialties and subspecialties, by enhancing the delivery of patient care through innovative HIT software and on-demand services that allow physician practices to function at their highest level of efficiency. Greenway’s *PrimeSuite* is a comprehensive, interoperable component of the integrated physician’s infrastructure solution, which serves as the starting point of a long-term business plan for physician practices. *PrimeSuite* 2008 is certified by CCHIT[®] based on 08 Ambulatory EHR certification requirements. *PrimeSuite* integrates a practice’s clinical, financial and administrative processes, and allows practices to increase profitability, enhance patient satisfaction and facilitate adherence to compliance guidelines. Established in 1998, Carrollton, Ga.-based Greenway Medical Technologies is a privately held company with approximately 300 employees.
