### **GREENWAY MEDICAL TECHNOLOGIES DEPLOYS INTEGRATED EHR, PRACTICE MANAGEMENT AND INTEROPERABILITY SOLUTION WITHIN BETHESDA HEALTHCARE SYSTEM**

#### **Deployment of Greenway's PrimeSuite Enables Health Information to be Securely and Seamlessly Shared between Bethesda Memorial Hospital and Physician Practices Associated with Bethesda Healthcare System**

*December 28, 2009, Carrollton, Ga.* – Greenway Medical Technologies, Inc. today announced the deployment of its fully-integrated electronic health record (EHR), practice management and interoperability solution, PrimeSuite®, into Palm Beach County, Florida's Bethesda Healthcare System (BHS) and its flagship hospital, Bethesda Memorial Hospital. BHS operates the 401-bed hospital as well as specialty practices that include family practice, internal medicine, cardiovascular surgery, neurology and orthopedics.

BHS contracted with Greenway in an effort to connect all of its affiliated practices with Bethesda Memorial while streamlining the clinical, financial and administrative workflows throughout the organization. Twelve providers began utilizing Greenway's integrated and certified PrimeSuite during the initial implementation that took place in November with another 550 providers having the option to implement the solution through an endorsement agreement with BHS.

Along with deploying PrimeSuite, BHS will also utilize Greenway's PrimeEnterprise™ to create an interoperable network through which patient information can be shared between the BHS practices and Bethesda Memorial. With PrimeEnterprise, practice managers, physicians and other care providers can securely and efficiently exchange patient information, from small billing issues to critical patient data, all in a safe, secure and timely manner. Additionally, PrimeEnterprise will allow each of the BHS practices to configure the enterprise system around their specific workflows and specialties while enabling BHS to consolidate individual practice billing operations through the PrimeEnterprise infrastructure.

Along with the workflow efficiencies expected through the use of *PrimeSuite* and *PrimeEnterprise*, BHS also plans to gain additional efficiencies through the deployment of *PrimePatient*<sup>®</sup>, which will allow BHS patients to benefit from the use of health IT as well. With *PrimePatient*, patients are able to request appointments online, complete registration and health history forms in advance, view lab results, interact directly with their care providers, request prescription refills and manage their personal health records (PHR) all through a secure patient portal.

“With the American Recovery and Reinvestment Act (ARRA) offering financial incentives for the meaningful use of certified EHRs, coupled with the improvements they will bring to our clinical, financial and administrative workflows, we felt it was the right time to invest in an integrated EHR, practice management and interoperability solution,” said Leslie Durham, CIO of Bethesda Healthcare System. “Our goal is to create an integrated healthcare system throughout South Palm Beach County, where all physicians have access to the pertinent healthcare information that will enable them to better treat patients and improve the overall health of our community.”

“*PrimeSuite* will help facilitate the controlled sharing of data and patient information throughout the Bethesda Health System,” said Tee Green, president of Greenway. “When healthcare providers like Bethesda implement and meaningfully use health IT solutions within their organizations, we move closer to achieving a nationwide interoperable healthcare system that ultimately will transform and improve population health on a national and global level. These investments and advancements made in the Boynton Beach community are most certainly a step in that direction.”

#### **About Greenway Medical Technologies, Inc.**

Greenway Medical Technologies provides the latest in EHR, ambulatory healthcare and clinical research business solutions and services to more than 22,000 healthcare providers nationwide, in 30 specialties and subspecialties, by enhancing the delivery of patient care through innovative HIT software and on-demand services that allow physician practices to function at their highest level of efficiency. Greenway’s *PrimeSuite* is an interoperable component of the integrated physician’s infrastructure solution, which serves as the starting point of a long-term business plan for physician practices. *PrimeSuite* 2011 is a CCHIT Certified<sup>®</sup> 2011 Ambulatory EHR, additionally certified in CCHIT’s Comprehensive program for Child Health and Cardiovascular Medicine with optional Advanced Reporting. *PrimeSuite* integrates a practice’s clinical, financial and administrative processes, and allows practices to increase profitability, enhance patient satisfaction and facilitate adherence to compliance guidelines. Established in 1998, Carrollton, Ga.-based Greenway Medical Technologies is a privately held company with more than 300 employees. **About Bethesda Healthcare System, Inc.**

Celebrating 50 years of caring for the community, Bethesda Memorial Hospital is the flagship of Bethesda Healthcare System. This not-for-profit, 401-bed hospital has served South Palm Beach County since 1959, with 550 physicians on its medical staff in more than 40 specialties. Accredited by The Joint Commission, Bethesda Memorial Hospital and its affiliates specialize in cancer care, endovascular and orthopedic surgery, maternity, pediatrics, neonatal intensive care and inpatient rehabilitation with the Cornell Institute for Rehabilitation Medicine. In 2008, Bethesda opened the Bethesda Heart Institute on the Hospital's main campus. This "heart hospital within a hospital" provides comprehensive cardiovascular services including: diagnostic, interventional, surgical services and cardiac rehabilitation. Bethesda Memorial Hospital is an Affiliate of the H. Lee Moffitt Cancer Center and Research Institute. For more information about Bethesda, visit: [www.BethesdaWeb.com](http://www.BethesdaWeb.com). Bethesda Healthcare System plans to build Bethesda West Hospital, an all new, 80-bed, acute-care hospital to serve the communities of western Boynton Beach, with groundbreaking set for the spring of 2010.
