NEW YORK CITY REGIONAL EXTENSION CENTER SELECTS GREENWAY

\$21 Million Grant to Connect Providers, Achieve Meaningful Use in New York's Five Boroughs

April 27, 2010, Carrollton, Ga. – Greenway Medical Technologies, Inc., provider of the integrated, single-database electronic health record (EHR), practice management and interoperability solution *PrimeSuite*[®], has been named a preferred provider of healthcare technology solutions by the non-profit NYC Regional Electronic Adoption Center for Health (NYC REACH).

NYC REACH was awarded a \$21,754,010 Regional Extension Center (REC) grant to aid the implementation of EHR solutions to healthcare practitioners throughout New York City as provided by the \$598 million REC program of the American Recovery and Reinvestment Act of 2009 (ARRA).

Within the REC program, granted agencies evaluate EHR solutions and their attendant best practices for recommendation to providers while also assisting with technical assistance, information clearinghouse services and overall guidance in the implementation, connectivity and achievement of meaningful use through EHRs.

“We’re very pleased to select Greenway as an option for New York City providers. We were impressed with their easy-to-use interface, their implementation and training support, as well as their positive user reviews,” said Amanda Parsons, MD, MBA, assistant commissioner of the New York City Department of Health & Mental Hygiene and director of NYC REACH. “Regional Extension Center grants are meant to jumpstart meaningful use EHR adoption, and with our focus on public health, we look forward to helping providers save lives and improve the quality of care in New York City.”

The grant application by NYC REACH was a collaboration between the Department of Health and Mental Hygiene and the Fund for Public Health in New York. NYC REACH is administered by the city’s Primary Care Information Project, which began EHR implementation efforts and consulting to New York City practitioners in 2005.

Greenway currently provides EHR solutions to practices throughout New York City, and has been providing consultative services to non-profit agencies nationwide seeking REC status.

“NYC REACH is one of the nation’s first granted REC programs to announce preferred EHR solutions, and its contributing agencies have shown a commitment to deployment so we are extremely proud to be able to drive improved public health outcomes and to further the creation of a national health information network,” said Greenway President Tee Green.

The REC program seeks to establish 70 centers throughout the United States linking primary care group practices, critical access hospitals, community health centers and related healthcare organizations in predominantly underserved areas.

NYC REACH plans to begin its implementation services immediately as part of the initial two-year REC grant. For more information, go to www.nycreach.org. For the Fund for Public Health in New York, go to www.fphny.org.
