

PQRI AND E-PRESCRIBING INCENTIVE SOLUTIONS

Through Greenway's CMS-qualified Physician Quality Reporting Initiative (PQRI) and electronic prescribing (eRx) registry, securing the 2% Medicare allowable incentives for each program has never been easier.

PQRI and eRx Benefits

For eRx, Greenway's CMS-qualified registry enables:

- Each eligible professional (EP) to receive 2% by leveraging Greenway's qualified eRx system
- Each EP ease of use by submitting all eRx prescriptions without the hassle of a claims based method (No G-codes needed)
- Each EP ability to meet the minimum 25 unique patient visits by pre-filling the registry automatically without any effort

For PQRI, Greenway's CMS-qualified registry enables:

- Each EP to receive an additional 2% incentive
- Each EP the flexibility to report the maximum 179 measures or all 13 measure groups
- Each EP to automatically receive compliance to Measure #124 Adoption of a certified Electronic Health Record (EHR)
- Each EP to seamlessly provide data for each measure or measure group once again without the hassle of a claims based method (No G-codes needed)
- Each EP to be alerted and prompted for the pertinent data elements for the enrolled measures

PQRI and eRx incentives are currently available through 2015, and in 2011 the eRx bonus is expected to increase. The Meaningful Use Final Rule allows eRx incentives to overlap in certain incentive pathways. Let Greenway analyze your best options for maximum ROI.

“Greenway's capability in PQRI and e-prescribe, and with the meaningful use initiatives, are going to allow us to be much more efficient, much more profitable and much more patient focused.”

– C. Ross Berry, CEO
Solaris Heart & Vascular
Kennesaw, GA

Enabling a way in which patients and providers seamlessly integrate Public Health, Quality, and Research into routine care within PrimeSuite.

Public Health

PrimeResearch enables seamless integration to local, state, and federal public health agencies such as CDC. Allowing a provider to track and submit reportable diseases and biosurveillance with ease.

Quality

PrimeResearch enables seamless integration to the multitude of quality programs today and in the future. Whether federal, private, or self initiated quality and outcomes program, participation is effortlessly accomplished.

Research

PrimeResearch enables participation in research at many levels whether through regulated clinical trials or broad scale academic learning. Patients, Providers, and Sponsors all win from this advanced and powerful approach to studies.

Innovation

PrimeResearch enables the future of medicine by continually seeking new and innovative solutions. Personalized Medicine exploration begins with genetics. Offering a state of the art genetic risk assessment assures the right care to the right patient.
