

PrimeSPEECH™

When diagnosing a patient, you do some of your best thinking out loud. PrimeSPEECH dynamically records, understands and organizes your thoughts.

"We wanted the system to work for our providers instead of adding labor to what they were doing. We felt that to be true about Greenway."

Janet Spangler
Practice Administrator
Family Medical Associates of Raleigh
Raleigh, NC

USING PRIMESUITE SINCE 2006

PrimeSPEECH™ takes the static out of speech-generated content. Dispense with costly transcription services that send you cumbersome blocks of text. PrimeSPEECH easily recognizes your voice, and your dictated notes are translated into discrete data organized into meaningful narratives and patient records.

Then, all those involved in the healthcare process can search, share and code content critical to a patient's case and never have to repeat the story from the beginning.

GREENWAY

PrimeSPEECH: Not Just Heard. Understood.

PrimeSPEECH replaces rudimentary and costly dictation services with embedded speech understanding — instead of merely voice recognition — improving return on investment, increasing accuracy and saving time.

- PrimeSPEECH recognizes and understands voices, including accents, after only 20 minutes of dictation.
- Improve speed and accuracy through an embedded medical dictionary, spell check and speech correction controls.
- Put words in their proper places with PrimeSPEECH's custom clinical templates.

- Review and edit content in real time before signing off.
- Import existing basic medical history from PrimeSUITE® facesheets into dictation templates.
- Create new, searchable documents, structured with section and subsection formatting for optimal organization.
- Place new patient data into previously saved documents and store it in a central PrimeSUITE database for fast access and flexible updates.
- Capture discrete data within primary dictation (XML/CDA).

Innovation and Evolution

In addition to its existing robust capabilities, the following PrimeSPEECH enhancements are underway:

- Evaluation and management (E&M) document coding
- Alerts and reminders
- Macro insertion
- Data export to facesheets
- Portability through remote dictation from Apple's iPhone via patient charts downloaded through PrimeMOBILE™
